

I am Andrea B. Paul and I am running for Township Supervisor. From the time, I moved onto Oxford Lane in Montgomery Township, I have felt that I wanted to do something for my township. It is a wonderful place to live but there is room for improvement.

Some of the concerns that I have relate to traffic safety, the unfettered building and development, traffic congestion and the need for more services for residents. My goals, also, include bringing about traffic safety by review of the signage in the township and coordination with police to cause a reduction of speeding. I would like to see an end to overbuilding and a protection of open space. I will like to see a continuation as well as an increase of tree planting. Our township is very beautiful and that must be protected, maintained and considered when building issues arise.

I would, also, like to see open, accountable and accessible government as well as more consideration of the needs of the residents. I would like to have the opportunity to determine whether we may bring more diversified activities, that residents want, to our township without increasing cost or taxes to residents.

I intend to be personally accessible to residents giving them a direct link to the Supervisors so I may assist them with their problems in the township or direct them to someone who may. The government must be transparent and there to create the best possible living environment for its residents. I would like to see the Supervisor's meetings televised so residents may be kept informed while in the comfort of their homes.

I love Montgomery Township and I seek the chance to work toward making it the best place it can possibly be. Please support me in this endeavor. Thank you.
